saris, Addis Ababa, Ethiopia

PROFILE

Motivated and versatile Software Engineer with hands-on experience in mobile application development, full-stack web development, augmented reality, and AI integration. Skilled in Java, C#, JavaScript, and modern web technologies. Experienced in building real-world systems including health alert applications, management systems, AR experiences, and AI-powered portfolio platforms. Strong problem-solving mindset with passion for building impactful digital solutions.

WORK/EXPERIENCE

position: System Administrator Intern
company: Little App Company – Addis Ababa, Ethiopia

PROJECTS

1. Marburg Alert (Android)

Stack: Java, XML

Developed a real-time health surveillance app for tracking virus symptoms and reporting outbreaks in Ethiopia.

2. AR Interaction (Unity)

Stack: C#, AR Foundation

Built an immersive mobile experience with spatial mapping and interactive 3D digital overlays.

3. Dormitory Management

- Stack: Java, SQL
- Created a desktop system to automate student housing, room assignments, and database management.

4. Car Dealership (Full-Stack)

- Stack: PHP, Tailwind CSS
- Designed a responsive marketplace with dynamic vehicle filtering and a mobile-first UI.

5. AI Portfolio (Web)

- Stack: Next.js, TypeScript
- Architected a high-performance portfolio featuring integrated AI components for visitor interaction.
- UI.
